## The Voice-Care Medical Cart

Designed and manufactured in conjunction with our partners Dalen Healthcare, the Voice-Care Medical Cart is the ideal companion to our Operating Theatre Solutions.

With the ability to be branded with a hospital logo, the cart is sturdy yet agile and features docking stations for both a PDA and a Jabra headset.

Boasting an in-built Jabra speaker and a convenient removable see-through ear bud storage compartment that offers a clear view of the number of ear buds remaining, the cart also facilitates quick and easy sanitisation.

Effortless manoeuvrability, pneumatic height adjustment, a coiled mains cable and integrated USB smart charging make the cart suitable for both mobile and stationary applications.

Ability to be branded with a hospital or Trust logo

### Easy transportation

Ergonomically designed with a small footprint and built-in handle for effortless manoeuvrability

### Accommodates all users

Pneumatic height adjustable cart to suit all users and applications

### Easily cleanable

Infection control-friendly design with antibacterial, easy-to-clean surfaces to prevent accumulation of dirt and germs

### Fully adaptable

Suitable for use with preferred PDA device

### In-built charging

USB smart charging for PDA and headset, as well as a coiled mains cable

### Built to last

Steel and compact laminate construction for ultimate durability

### Zebra HC20 PDA

- + Dedicated emergency alert call button
